Insert structure offers increased design possibilities

The insert structure of the mold provides the opportunity for added originality and branding.

Material
Bottle: Bio-PET

Molding method: ISB *1

*1 Molding method: "ISB" stands for "injection stretch blow"

TCS Takemoto Colour Selection

Compatible Component

A selection of a total of 26 colors, including 19 standard colors and 7 gentle nuanced colors is available for PET injection stretch blow molded products. This range of stock colors can shorten the development period from product planning to commercialization.

Containers made with plant-derived raw materials

These containers are made with biomass plastic in which molasses from plants (sugar cane etc.) is used as a raw material so that the ethylene used in the production of the resin is bio-based.

Selection of options for product line development

Ideal for gift sets, complete skin care makeup lineups
